

NATIONAL FUEL GAS RATES INCREASED

National Fuel Gas submitted to the Pennsylvania Public Utility Commission its adjustment gas supply charges. This 40.9% increase became effective Aug. 1, 2016.

One way to reduce or control your usage is to set the furnace thermostat at 68° F or lower (but no lower than 55° F), and the air-conditioner thermostat at 78° F or higher. Between 3% and 5% more energy is used for each degree the furnace is set above 68° F and for each degree the air conditioner is set below 78° F.

Customers who are having trouble paying their bills are encouraged to call National Fuel Customer Service at 1-800-365-3234 to discuss available payment programs and services.

DISHWASHER

For optimum efficiency, do not overload your dishwasher and only use dishwasher detergent recommended for automatic dishwashers. Be sure to rinse your dishes prior to stacking them in the machine. If dishes appear "cloudy", check the rinse-aid dispenser—it may need refilling. To clean the exterior of the dishwasher, wipe with a warm, damp, sudsy cloth. Rinse and wipe dry. Avoid gritty or harsh cleansers, as they will damage the finish. Generally the interior of the dishwasher is self-cleaning. The tub and strainer should be periodically checked for foreign objects.

Be sure to run your dishwasher at least once a month, especially in the summer months to prevent any odors from forming within the basin of the machine.

Keep screen doors unlocked and alarms off if you've called us for service. Otherwise, the maintenance team will be unable to access your apartment to make the repairs you need.

Trash is for dumpsters. Put trash in the dumpster's and NOT around or outside them. Help keep our neighborhoods beautiful and sanitary.
